## EIFL provision Meets 5 Policy Options on SPR

**Include broad range of scientific output (not only journal articles)**

✓ All types of outputs – articles, book chapters, images and tables

**Relax threshold requirement for public funding (50% or less)**

✓ No minimum funding requirement, direct and indirect public funding

**Expand scope to include VoR (essential for citation purposes)**

✓ All versions incl. the VoR

**Minimize embargo periods (no embargo or only a short period)**

✓ No embargo

**Allow all types of uses (restriction to specific forms of use, such as non-commercial purposes, seems outdated and overly restrictive)**

✓ All types of research, no distinction between commercial and non-commercial
